

Over the counter medication policy:

The state of Ohio permits schools to give over the counter medications. St Martin of Tours School will do so with these guidelines:

- Medication must be brought to school in its original container with child's name clearly marked. (The parent must bring it in, not the student)
- The medications must be age appropriate for the child taking it. Any changes in the prescribing instructions that differ from what is on the bottle/package label must be accompanied by a physician's order
- Parent must fill out medication administration form and sign giving the school permission to administer the medications/release St Martins of any liability concerning the administering or non-administering of the medication..
- The school reserves the right not to give the medication if it is not appropriate at the time that it is requested.
- Parents will not be notified each time the medication is given but will be notified if the pattern of requests increases or changes.
